

ShiftProof

WhatsApp shift photos → AI clause scores managers can Trust.

TRACK: AI for Industry, Business & Productivity

TEAM DETAILS

Team Name: Lunarix College / Institution: ICFAI University Tripura

Members: Ankesh Paul - Full Stack, AI Implementation,
Riya Sinha - Frontend, Documentation

Contact: Email:- anikesh.personal@gmail.com, 9774012453
riyasinha12225@gmail.com, 9863494779

THE PROBLEM

SOPs exist. Daily proof is a chaotic WhatsApp dump.

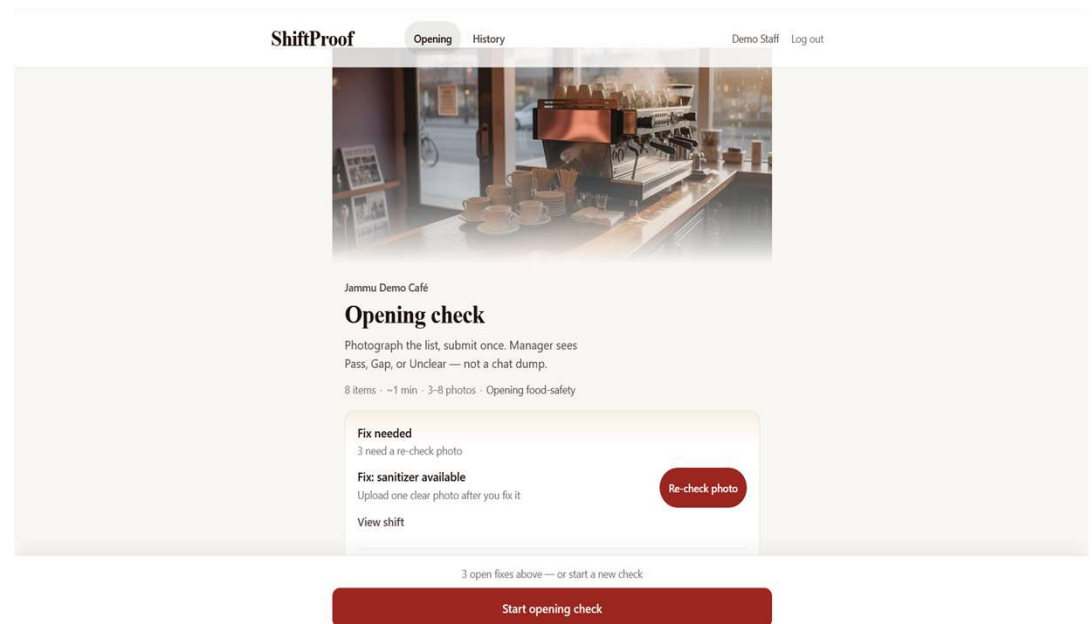

Rules live in PDFs. Proof is a messy WhatsApp thread.

Problem Statement

Small cafes need daily proof - not a heavy enterprise tool

- **Who:** cafe owners and managers who run the floor
- **What breaks:** SOPs nobody opens, random chat photos, no history
- **Why now:** phone photos can finally be checked against the SOP
- **If ignored:** gaps only show up on inspection day

THE SOLUTION

Photos in. Pass, Gap, or Unclear out.

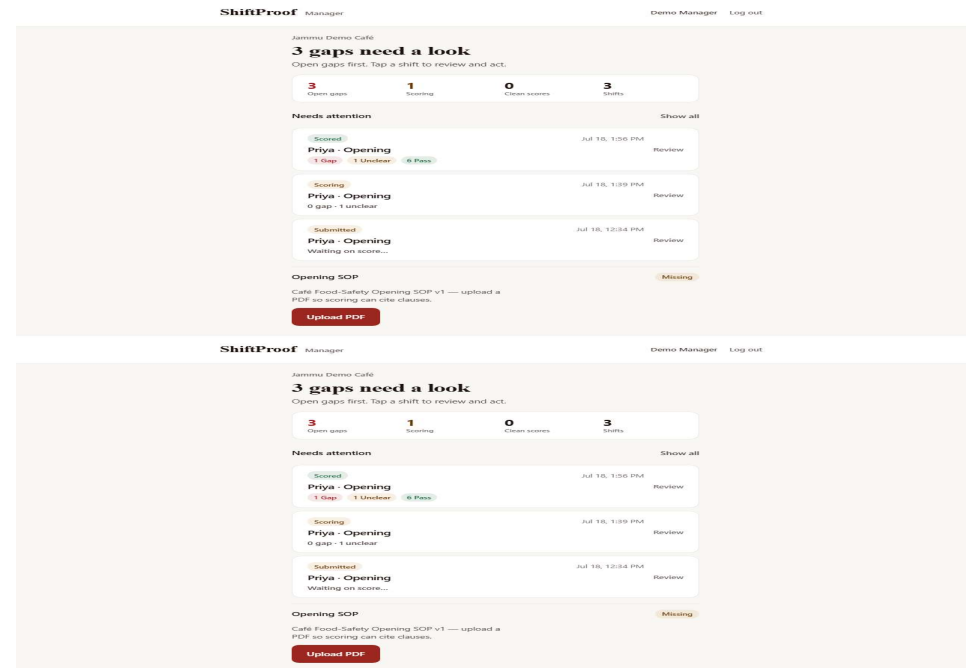

Each score quotes the SOP. Fix it, then export one page.

Proposed Solution

Staff photos in. Live scoreboard out. PDF when you need it

- One focus for the demo: cafe opening food-safety checks
- Each finding shows the SOP clause, a quote, and confidence
- Blurry or unsure photo? Mark Unclear – manager decides

WHY IT'S DIFFERENT

Innovation & Technology

Innovation & Uniqueness

- Not a chat about rules - photo, score, task, pack
- Every row cites the SOP - and can say Unclear honestly
- Deep on cafe openings - not a bloated all-industry QMS
- A checklist can't see a messy photo. Vision plus SOP can.

Technology Stack

AI / Model Layer

Vision model returns Pass / Gap / Unclear

Agents & Automation

runShiftScore automation: sees photos, matches SOP, gives score, cites

App & Backend

React web + Appwrite auth, DB, storage, live feed

Cloud & APIs

Appwrite Pro + one vision API – no model training

FEASIBILITY & SCALABILITY

From Prototype to Real-World Impact

Idea Evaluation

Can we ship a cafe opening check in 4 days - and grow later?

- **Feasible:** Appwrite Pro + one vision API React.
Full loop in 4 days.
- **Risks:** AI mis-scores a photo, thin demo, API blip
- **Handle it:** Unclear + manager override, demo photo kits, backup video
